

Caring for Your Tuff Skinz Outboard Motor Cover.

Tuff Skinz Product Fabric Cleaning

Your **Tuff Skinz** fabric may be cleaned with a solution of 4 ounces of bleach and 2 ounces of mild soap mixed in one gallon of warm (100 F) water. **DO NOT** use harsh detergents, high-pressure washers or a washing machine – Instead use a soft-bristled brush to scrub and lift contaminants embedded in the fabric. Rinse thoroughly with clean water. allow to hang or air dry. If the underside gets wet, please allow it to dry completely before reinstalling on your motor.

After thoroughly cleaning and drying your cover, water repellency and UV fade protection may be reduced. An application of **Tuff Stuff** spray will rejuvenate and protect your cover like new. Simply spray it on evenly to all exterior areas of your cover and allow to air-dry.

Tuff Skinz fabric is treated to resist the growth of mildew and gunk but accumulations of mud, bait, dirt and bird dripping can stimulate the growth of mildew and result in fabric staining. So it is good to remove and clean your **Tuff Skinz** cover periodically using these cleaning methods.

The pigmentation in your **Tuff Skinz** fabric should not migrate to upholstery vinyls, etc. If some surface rub-off should occur, it can easily be removed with vinyl cleaner or mineral spirits.
